

**what does a landfill have to do
with the circular economy?**

**it is essential to allow it
to circulate!**

The landfill of the past has no future

To eliminate all wastes, among all the other systems require, final disposal of the portion of wastes that cannot be recycled or recovered is essential:

few, modern, sustainable and only at the services of the circular economy.

La Filippa is designed:

With a view to environmental restoration consistent with destination for future use; according to the territorial enhancement programs.
